LOW VOLTAGE MINIATURE CHANNEL LIGHTING SYSTEM

Tempo Industries' **MINIATURE CHANNEL LIGHTING SYSTEM** is designed to offer increased visibility and years of easy service.

The **MINI**CONTOUR System is a combination of decorative PVC channel with a selection of the highest quality light sources that make it the most attractive and versatile low-voltage channel light system available.

Product Features:

- ◆ For both interior and exterior use.
- ◆ Unlimited design possibilities are available through the inherent flexibility of the PVC channel.
- ◆ The low profile gracefully enhances any application.
- ◆ Various colored and metallic decorative channels are available.

Exterior **MINI**CONTOUR System

Interior **MINI**CONTOUR Systems

- ◆ Incandescent or LED light sources are available.
- ◆ Light sources are individually replaceable for easy maintenance.
- ◆ Static or chase systems available.
- ◆ Assorted colors are available.
- ◆ Various light source spacings are available.

Installation Features:

- ◆ Factory assembled in standard or custom lengths, easily modified at the job site.
- ◆ Two-step installation includes mounting the base to the desired surface, then snapping on the decorative cover.
- ◆ Parallel wiring utilizing Class II power supply allows each light source to operate independently, providing superior safety and ease of maintenance.
